

Further Draft Details 7-24-20@1:04 PM Journal Entry

“This 1st draft, God, how are they going to know how to pick up people if the electricity is off in some places? The areas that are affected by the blasts of either the nuclear, or the EMP blasts from them, or both.” “It’s even as you have thought Child, for it is I, who has been showing you these things. The military will come into the homes of such areas, even picking some off the streets, and if you cannot prove that you are taking care of children, being the one parent doing so, or taking care of an elderly person or people, again the only person doing so, then you will be picked up. It’s not until the 2nd round of drafting that some areas will be able to pull from lists, but even then this will be difficult until the people are taken count of and identified in these designated safe zones, and yes, Child, this is where most of the drafted people will come from. Except for the random drives by the military in areas that have been affected by these weapons of the nuclei. For so great shall be the need for soldiers after the invasion begins upon your nation’s soil.”
