Morocco Braces for Heat, Dusty Winds, and Scattered Storms

Morocco has experienced a succession of heatwaves in recent weeks.

Firdaus Naim — Aug. 23, 2026

Morocco experiences scorching temperatures during a heatwave, with a thermometer showing high temperatures.

Rabat – Morocco's General Directorate of Meteorology (DGM) forecasts relatively hot to hot weather across the Southeast and inland areas of the Saharan provinces on Sunday. [Buy Maps](#)

Heat, thunderstorms and blowing dust forecast across Morocco

Hespress EN

Thursday 20 August 2020 - 10:00

Morocco will remain hot across the southeast and the eastern and southern Saharan provinces on Thursday, the General Directorate of Meteorology said.

Dense low clouds are expected along the Atlantic coast and plains during the morning and evening, bringing patches of fog and isolated light rain. Unstable thunderclouds may also produce scattered rain in the Oriental region and along the eastern Mediterranean coast.

Moderate wind gusts are forecast across the northern and central plains, the Atlas Mountains, the Oriental region and the southeast. Stronger gusts could lift dust across the southern provinces.

In August 2026, Morocco experienced **multiple episodes of extreme heat, strong winds, and localized dust storms**, particularly in the **southern and Saharan provinces**.

- August 3–6, 2026:** The DGM issued an **orange heatwave alert** from August 4–6, with temperatures of **44–47°C** in the south and Sahara, peaking near **47°C in Es-Semara** [🌡️ weather.moroccohelp.com](#) . Alongside the **heat, strong winds (75–80 km/h)** were forecast, raising the risk of **localized sandstorms** in the far south [🌡️ weather.moroccohelp.com](#) . This was the most intense heat episode of the week, with tropical nights in the south where minimums failed to drop below 30°C [🌡️ weather.moroccohelp.com](#) .
- August 3, 2026:** The DGM noted **extreme heat** in the south and southeast, with **dusty winds** over the interior and scattered thunderstorms in the Atlas Mountains [🌡️ weather.moroccohelp.com](#) . This set the stage for the following days' heatwave and dust risk.
- Mid-August (August 3–20):** The DGM forecast **moderately strong wind gusts** across the eastern highlands, Atlas Mountains, southeast, and Saharan provinces, which could **lift dust and reduce visibility** [🌤️ Morocco World News +1](#) .
 - August 3:** Low clouds, fog, and light drizzle over the Atlantic coast, with dusty winds in the southeast and Sahara [🌤️ Morocco World News](#) .
 - August 4–6:** Continued heatwave with sandstorm risk in the deep south [🌡️ weather.moroccohelp.com](#) .
 - August 20:** Dense low clouds along the Atlantic coast, with **stronger gusts lifting dust** across the southern provinces [🌤️ HESPRESS English](#) .

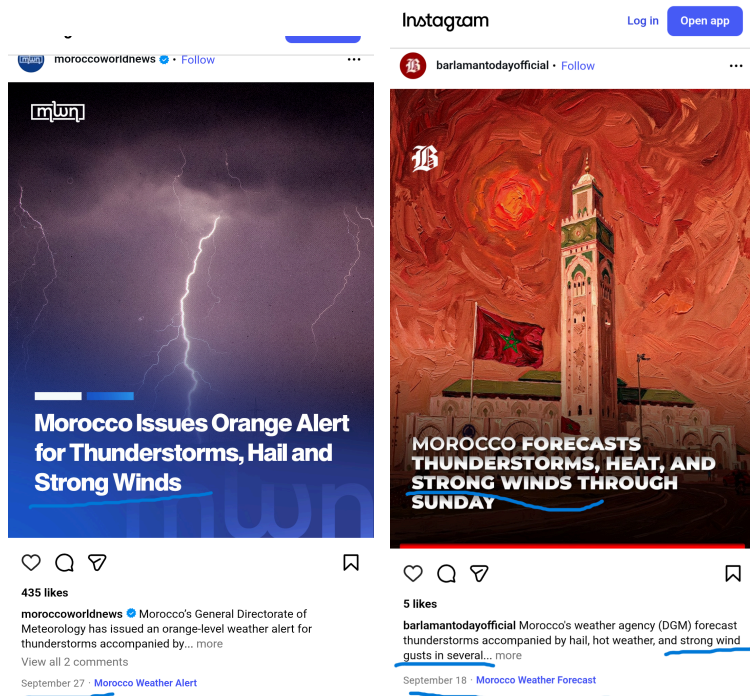

- **Extreme heat & dust risk:** Oued Ed-Dahab, Assa-Zag, Es-Semara, Tata, Taroudant, Zagora, Boujdour, Aousserd, Errachidia, Moulouya Valley, southeast, and southern Sahara
weather.moroccoohelp.com +1
- **Moderate dust risk:** Eastern highlands, Atlas Mountains, Oriental region, and parts of the southeast
[Morocco World News](https://morocco.worldnews) +1

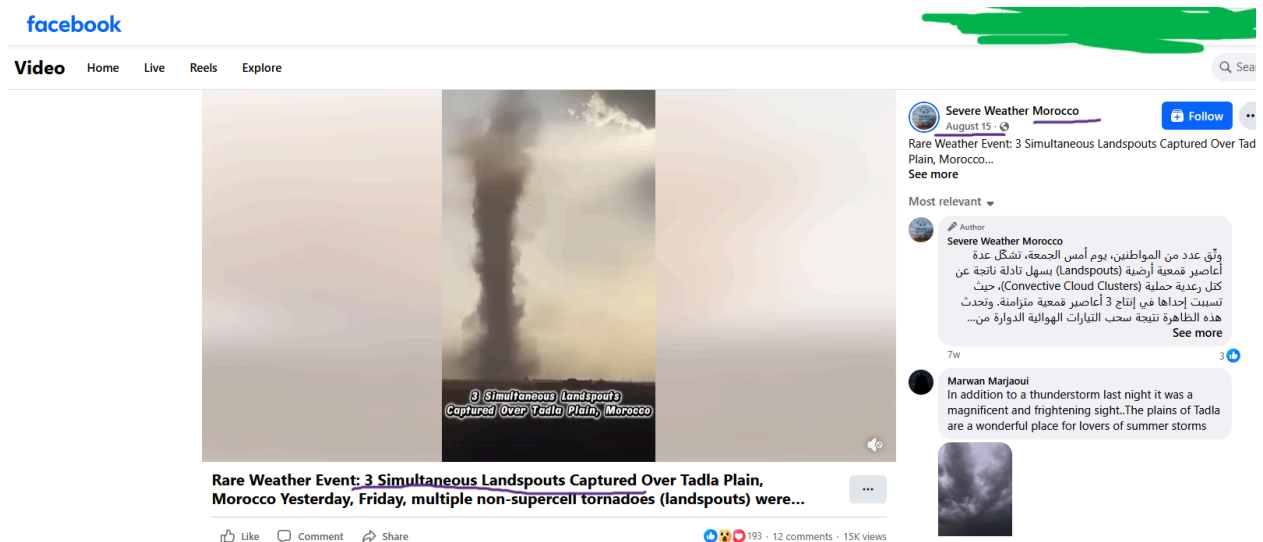

- Avoid strenuous outdoor activity during peak heat hours (10 a.m.–4 p.m.).
- Stay hydrated and seek shade or air-conditioned spaces.
- Travelers should plan for **reduced visibility** in dust storms, especially in the south and Sahara.
