

Raining Rocks with Metal (Fireballs...Meterors & Such Like Confirmation 3-16-26)
FOR THE GLORY OF FATHER GOD & JESUS CHRIST!

Have I Got Your Attention Yet? 3-10-26@ 6:43 PM

Now Babylon, America, now O' world, brace yourself for I'm sending rain, rain of another kind upon you. Not of water, but of rock and metals, for this is what most that falls shall consist of. Not a pouring rain, but one that shall get your attention.

The Official Declaration of War to Babylon-America from Jesus Christ 3-12-26@12:39 PM
Shared 3-14-26

"Jesus Christ releases now in the next round of strikes officially against Babylon-America these things in no certain order.

1. The destroyer, he who slays.
2. Rain
3. Lightning
4. Winds
5. Nature's fury of tornadoes
6. Snow
7. Hail
8. Thunder
9. Earth shaking
10. Water fury in escalation

11. Rocks falling from the sky and below

Meteorite

A **meteorite** is dense, metallic, irregularly shaped, and contains pits. Meteorites are pieces of metal or rock fragments that hurl from space toward the Earth. These rare objects can be difficult to decipher from regular rocks and stones, but there are a few ways to help distinguish them.

Rare fireball explodes over Fairbanks sky — and someone caught it on camera

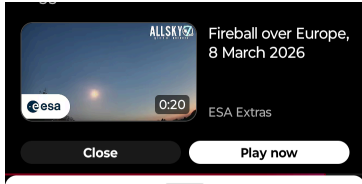

NASA confirms it was not a satellite that was expected to burn up in Earth's atmosphere

By [Drew Swartz](#) and [Amy Shultz](#)
 Published Mar 10, 2026 at 6:18 PM CDT | Updated 7 hours ago

UNUSUAL: Alaska SKY — A bright fireball streaked across the Fairbanks sky Tuesday morning, drawing reports from residents who witnessed the event from their cars and homes.

The fireball — which streaked across the sky at around 7:32 a.m. — was also caught on camera.

In the hour after it occurred, some speculated that the fireball may have been a 1,000-pound NASA satellite that was [predicted to enter Earth's atmosphere sometime on Tuesday or Wednesday and burn up.](#)
