**...20 second mark to 3 minute mark on Video.**

Now before we start Holy Spirit in Jesus Christ's Name lead my every word. I submit to You. I have a message to the uppers upper powers of this nation and of this world this nation in particular and agent Steve if you're listening I dealt with you before. In Jesus Christ's name I say this to those in the upper realms of power here. The executable file you activated when I turned my computer on that sweet Holy Ghost Spirit let me see has failed. Are you tired of losing yet? You hit my firewall, let me identify that. That would be Father God... Jesus Christ! My God is a consuming fire. Hebrews 12:29, you might want to look that up. Then you hit a double whammy! You ran into the Blood of Jesus Christ that covers and protects through my covenant with Jesus Christ when He redeemed me. It's not like before. I know who I belong, and I know the power and authority I have and you're trespassing and you were sent off.

*Now I have a Word from my lovely Jesus Christ and Father God to you. Look for viruses with holy algorithms to go deep into your systems destroying all with my God's consuming fire, He told me to let you know He's fighting my battles and you have angered Him very greatly. This time you have failed again kingdom of darkness,* and by the way in Jesus Christ's Name there's absolutely no retaliation, backlash, interference, spying, monitoring, tracing.. anything you would try to do in retaliation for what I'm saying. Because I'm under a direct mandate from the Lord Jesus Christ. My systems, my computer... everything I utilize is dedicated to Him and is holy. You keep your stinking self out of here in Jesus Christ's Name, you hear me? You are bound from entering anything else. Keep trying but every time you try you're going to do it to your own system, and even (when) you do it to your own system... trying to send it back to me, it does not work because my God is a consuming fire. My God fights for me just like He does each and every one of His children. We're not all sitting here taking it anymore.

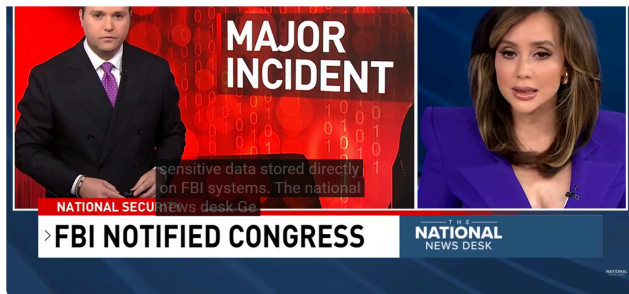

**Bank Collapses, Fuel & Food Rations to Come for USA & Other Nations 3-28-26@3:12 PM.....1:15 minute mark to 4:40 Mark on Video**

All right. Now again to the uppers in Jesus Christ Name. I say this to those in the upper realms of power here in this whole firmament. The executable file you tried to activate when I turned my computer on that sweet Holy Ghost Spirit let me see... has failed again. Are you tired of losing it? You hit my firewall. That would be my God who is a consuming fire. Check it out. You know God Almighty, Jehovah, who sits on the throne. Then you hit a double whammy. That would be the Blood of Jesus Christ. I'm sealed. I am washed in His Blood. My home is protected just like Job's. You cannot get in. This is what I'm going to say again, and if you look at what's been happening in the cyber realm, this is a result of the last time I said this.

*Look for viruses with holy algorithms to go deep in your systems. I'm like, you might want to check a little house on a hill that's, you know, painted white to go deep in your systems. And I didn't do it. This is what I'm hearing. Look for viruses with holy algorithms to go deep in your systems to destroy all with my God's consuming fire. He told me to let you know He's fighting*

*my battles and you have angered Him greatly this time.* You failed and there's absolutely no retaliation for this. And let me say one more time, you cannot get through this firewall because it is God Almighty the consuming fire. If you will go back and I know kingdom of darkness, you know the word of God well, when the Israelites were at the Red Sea and God was parting that water for an escape, you were held at bay by that fire. So are you now. That's the God I serve.

*So each time you try to put this in, these things are released into your system. I don't know what they are, but you're going to see it appearing from other nations.* Now you think on that, because I done told you, you cannot get through this impenetrable firewall because it's God, the consuming fire and the Blood of Jesus Christ. Now, I'm letting Father God handle it. He's fighting for me. I'm not praying nothing. I do send the warfare right back to you in Jesus Christ's name. I love you and forgive you. Agent Steve, get over yourself. You lost. You lost a moment. I left Tennessee. God bless. Here we go. Lord, I give you praise. I give you praise, Lord. I give you praise. Lord, I thank you because we serve a God that makes the invisible things seen and I have prayed to see all without any woohoo wahoo garbage being able to cover it and you have been faithful and you will always be Deuteronomy 7:9.

'MAJOR INCIDENT': Members of Congress targeted in cyber hack

The National Desk 748K subscribers

1,005 views Apr 2, 2026

FBI officials recently reached out to members of Congress to alert them to a cyber hack classified as a "major incident."

### FBI declares suspected Chinese hack of US surveillance system a 'major cyber incident'

The designation suggests the hackers successfully compromised swathes of sensitive data stored directly on FBI systems.

The breach of a sensitive FBI surveillance system does not appear to be connected to a recent Iranian-linked compromise of FBI Director Kash Patel's personal emails. | Francis Chung/POLITICO

By JOHN SAKELLARIADIS 04/01/2025 02:43 PM EDT

The FBI last week deemed a recent China-linked cyber intrusion into a

A month ago, CNN reported that suspicious activity had been detected on an FBI surveillance network. The FBI has identified a suspected cybersecurity incident on a sensitive network used to manage wiretaps and intelligence surveillance warrants, and officials are working to determine the seriousness of the incident, according to an FBI statement and a source familiar with the investigation. "The FBI identified and addressed suspicious activities on FBI networks, and we have leveraged all technical capabilities to respond," the bureau said in a statement to CNN on Thursday, declining to elaborate.
